**2011 CHIRP Data Report**  
**HCP Community Encounter - Results and Duration**  
**October 2009 - September 2010**

This tables in this workbook count the total number and time spent on community encounters entered into the HCP CHIRP database during the federal fiscal year ending September 30, 2010. The data captures the community group with which HCP staff met and the result of that encounter for the local HCP health agency. Only actual results reported are included in these reports. If a region did not enter results for certain categories, those categories are not shown in the reports.
